

From Chaos to Control: Unify Your Business with a Single, Powerful Platform

A practical guide for Indian SMEs to simplify operations, reduce costs, and accelerate growth with ERPNext and Gnosys Digital.

Does Your Day-to-Day Operation Feel Like This?

Many growing businesses in India are held back by systems that don't talk to each other. Manual data entry, duplicate work, and a lack of real-time information are roadblocks to growth.

Excel Sheets

Manual Ledgers

Tally

Disjointed inventory and invoicing

Time-consuming duplicate data entries

No real-time view of business health

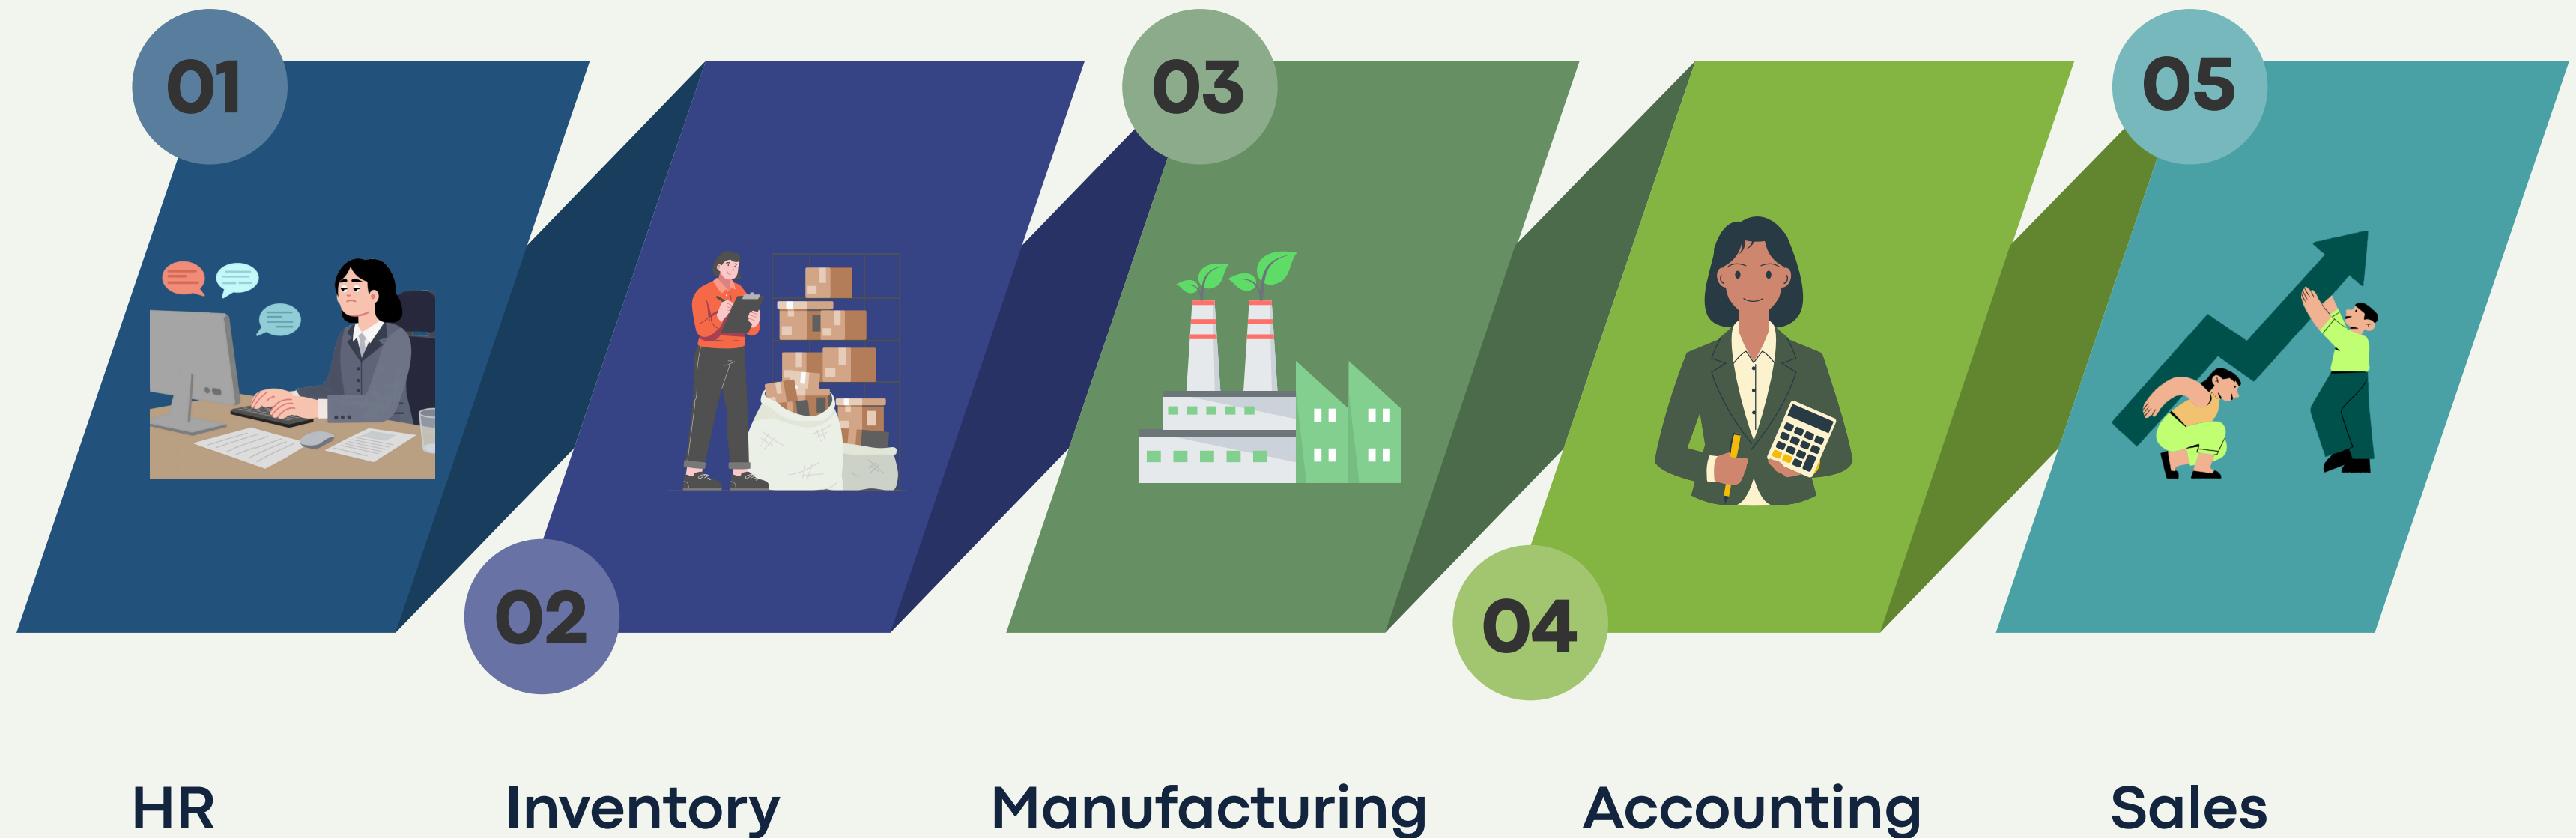

Slow and error-prone billing cycles

Difficulty scaling operations

It's Time to Run Your Entire Business from One Place.

Imagine a single source of truth for your entire operation. ERPNext brings all your critical functions together, giving you the control, scalability, and savings you need to thrive.

Why ERPNext is the Smart Choice for Growing SMEs.

01

Open-Source Power

The platform is built on opensource technology, which means zero recurring license costs. You invest in implementation and customisation, not expensive annual fees.

02

Fully Modular & Integrated

Start with the modules you need today and add more as you grow. All modules are seamlessly integrated from day one.

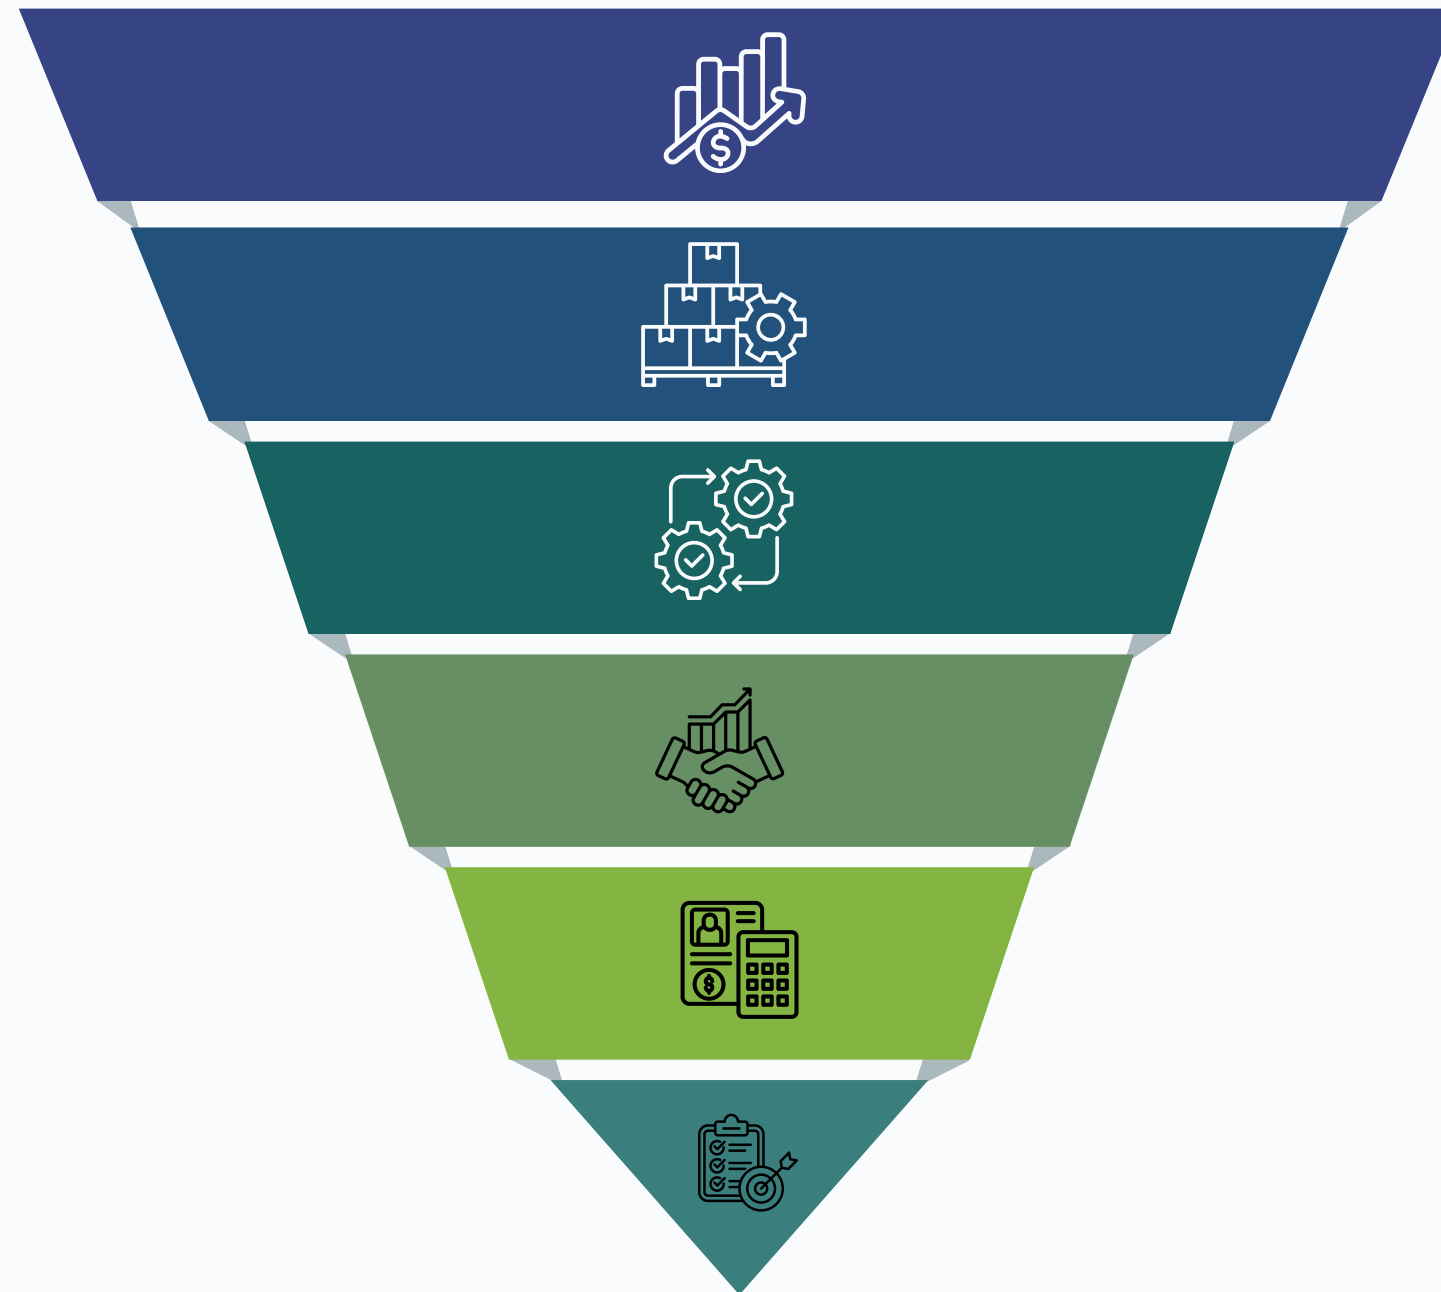

03

Cloud-Based Access

Securely access your business data from anywhere, at any time, with role-based permissions for your entire team.

A Single Platform for All Your Core Functions

01

Accounting & Finance

Manage invoices, ledgers, and financial reports in real-time.

02

Inventory & Warehouse

Track stock levels, batches, and inter-warehouse transfers effortlessly.

03

Manufacturing

Manage production planning, Bills of Material (BOMs), and material flow.

04

CRM & Sales

Automate leads, create quotations, and manage sales follow-ups.

05

HR & Payroll

Handle employee records, attendance, and salary slips - all in one place.

06

Projects & Planning

Organize tasks, track progress, and collaborate on projects efficiently.

The Right Tool is Only Half the Solution. You Need an Expert Partner.

- ▶ **We are not just ERP implementers**
- ▶ **We are a digital transformation partner focused on SME success**
- ▶ **We ensure your ERPNext implementation is done right**
- ▶ **Fast execution without unnecessary delays**
- ▶ **Affordable solutions tailored for SMEs**
- ▶ **Zero chaos with smooth and structured implementation**

Your Implementation Partner for ERPNext - Done Right.

Our Approach is Built Around Your Business, Not Just Our Software.

01

Business Understanding First

We start by mapping your existing workflows, not by pushing modules. Every setup is precisely aligned with how your business actually runs.

02

Complete End-to-End Implementation

We handle everything in-house: from initial server installation and data configuration to user training and ongoing support.

03

Affordable & Transparent Pricing

You get clear, fixed-cost packages designed for SME budgets. There are no hidden fees or enterprise pricing traps.

ERPNext in Action: A Real SME Success Story

The Client

Manufacturing
Unit, Gujarat

The Challenge

Operations managed with disjointed Excel-based inventory and invoicing systems.

The Gnosys Solution

A fully configured ERPNext setup for Inventory, Accounts, and HR modules.

The Outcome

- 50% Faster Billing Cycles
- Zero Duplicate Entries
- Real-time Business Insights

Enablement

05

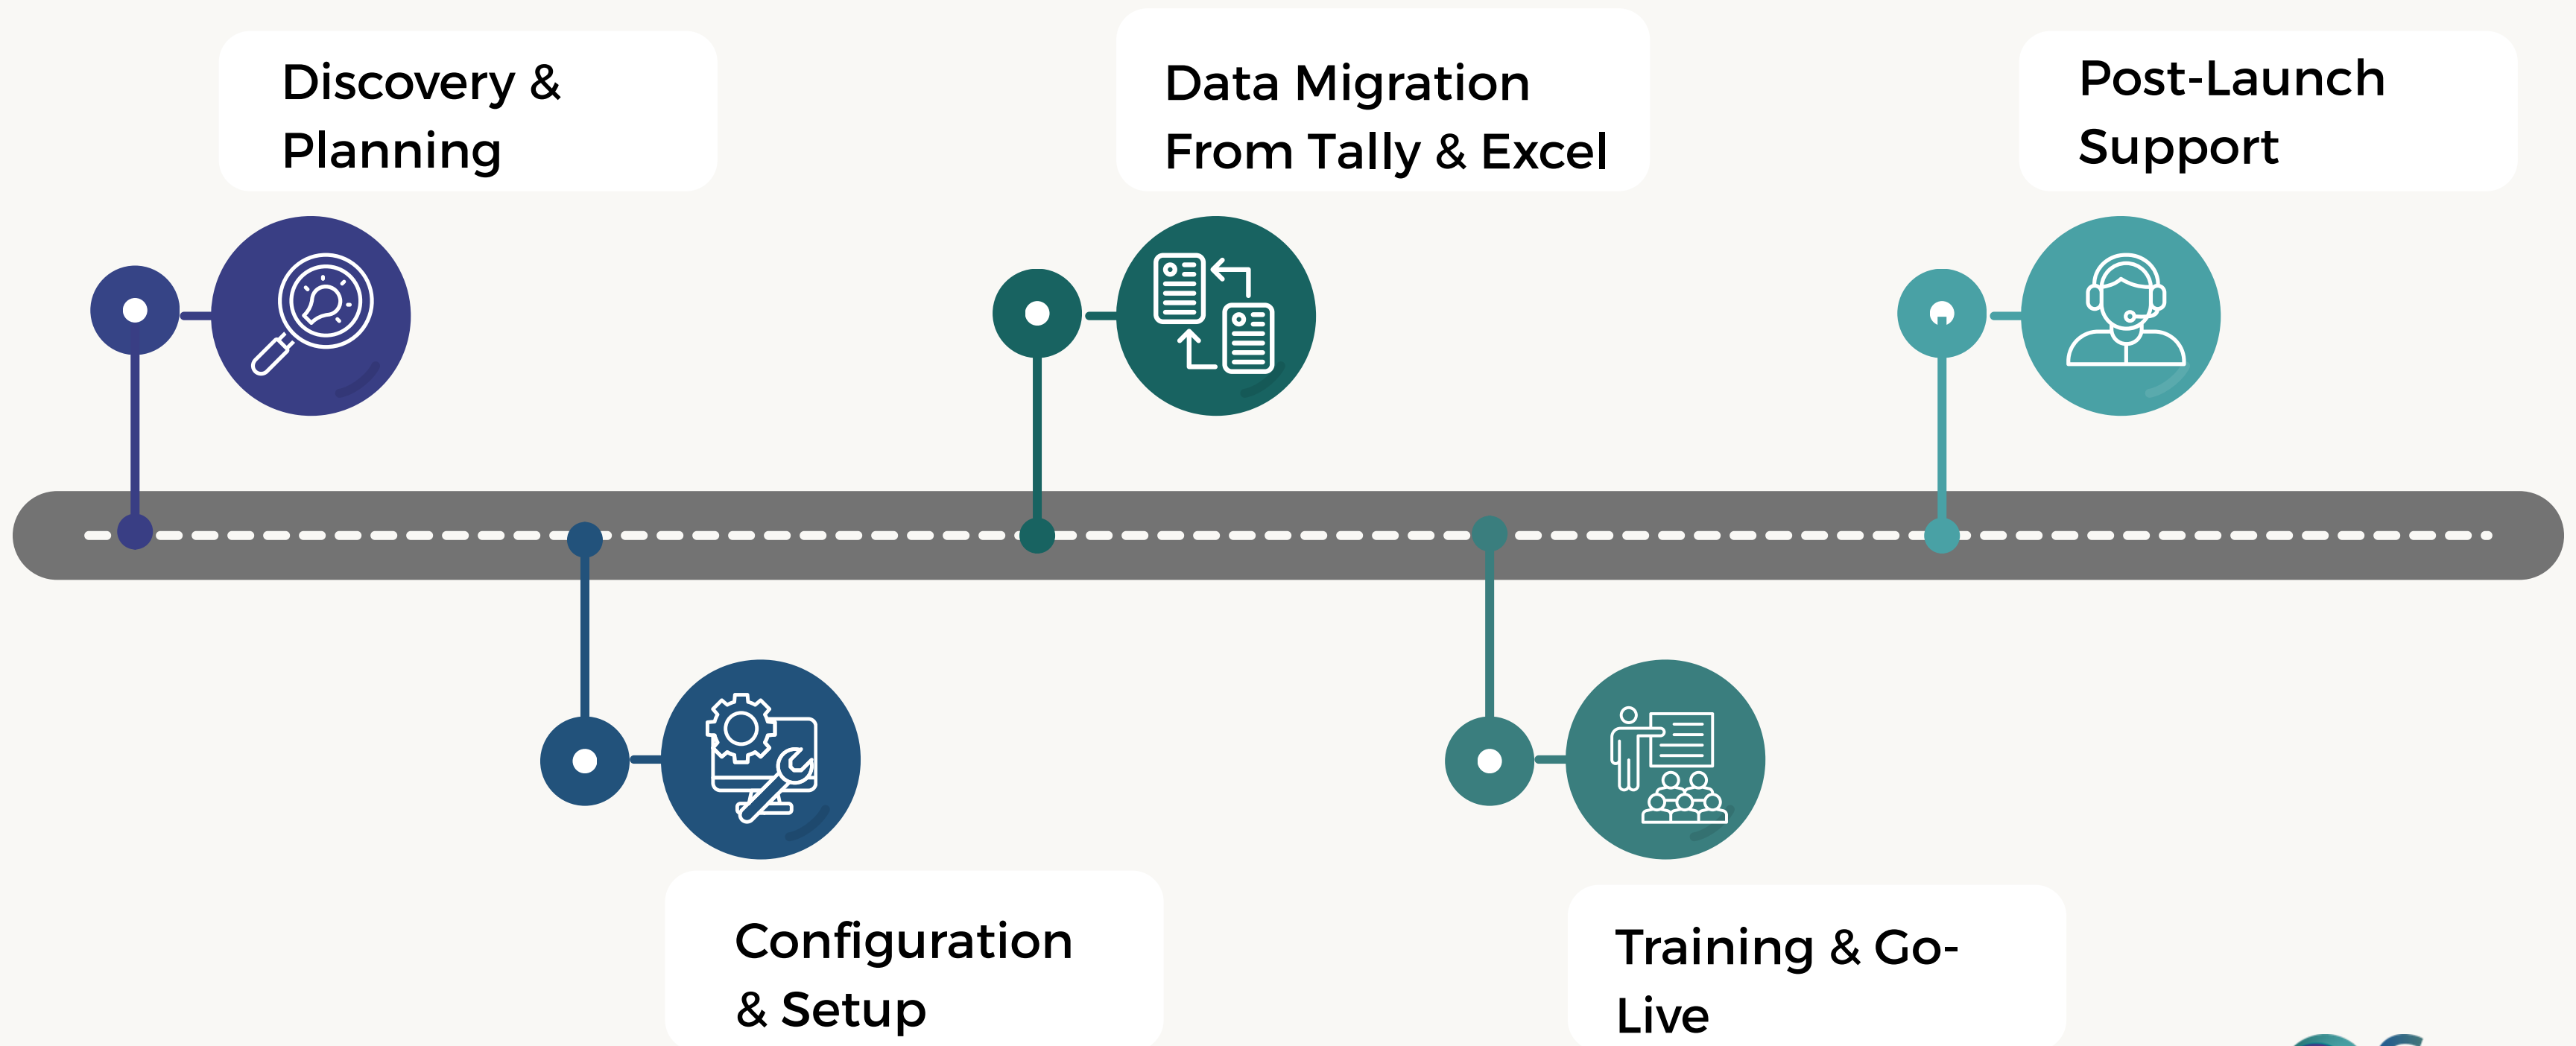

Advanced Reporting
Dashboards

06

Server Setup & Cloud
Hosting (TD Web Services)

Your Seamless Path to a Unified System.

Typical Implementation Timeline: 3-6 Weeks

Answering Your Key Questions

01

Can I migrate my data from Tally or Excel?

Yes. We provide complete data import and structure mapping services to ensure a smooth transition.

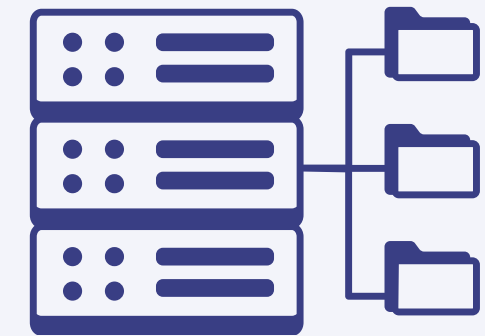

02

What kind of support do you offer after the launch?

All our implementation packages include 30 days of free post-launch support. Optional Annual Maintenance Contract (AMC) plans are also available for long-term assistance.

03

Do I need my own server for ERPNext?

Not necessarily. We offer both secure cloud hosting and on-premise, self-hosted deployment options to fit your needs.

Let's Simplify Your Operations.

Tell us about your business challenges. We'll recommend the right modules, provide a detailed timeline, and give you a clear, no-obligation quote.
